

SLA PARTS...FAST!

SLA models can be produced in a matter of hours

Stereo Lithography (SLA) is the ability to produce accurate models and patterns with record turnaround times from a digital file. SLA is of the most accurate and precise rapid prototyping technology available today.

Produced at a cost of only \$10.00 per cu/cm

SLA models can be produced in a matter of hours from any popular 3D CAD file, IGES or STL model file. Because of their accuracy and ability to reproduce fine details, SLA models are ideal for use as:

concept models
master patterns

form and fit studies
low volume production
